**MICROSOFT EDGE**

Copy/paste the following address into your address bar - **edge://settings/system/noSleepBlockList**
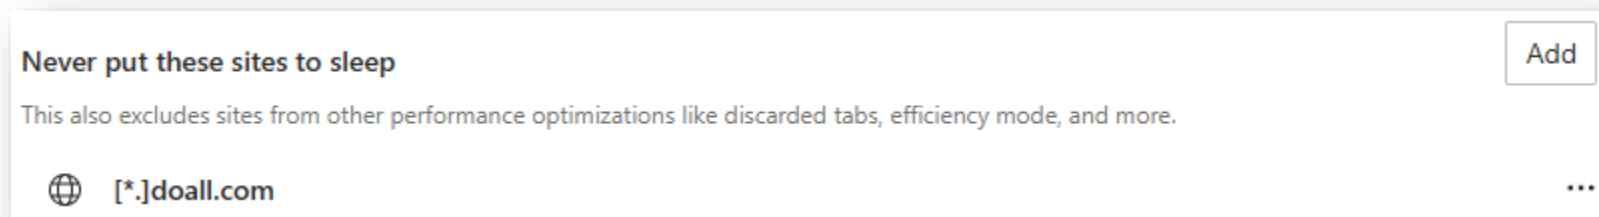

A Settings page will open with an Add a Site pop-up box present in the center of the screen

Enter the following address - **[*.]doall.com**

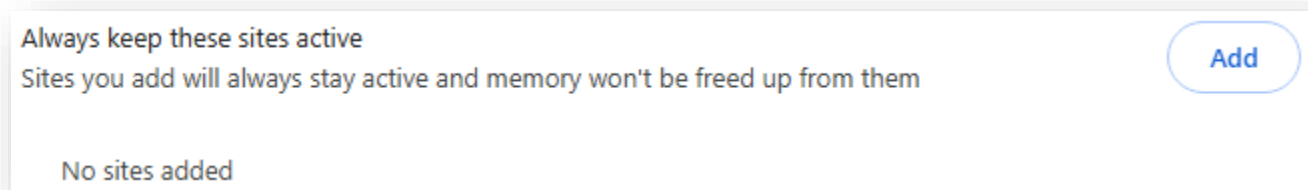

Click **Add**

You will now see the site listed.

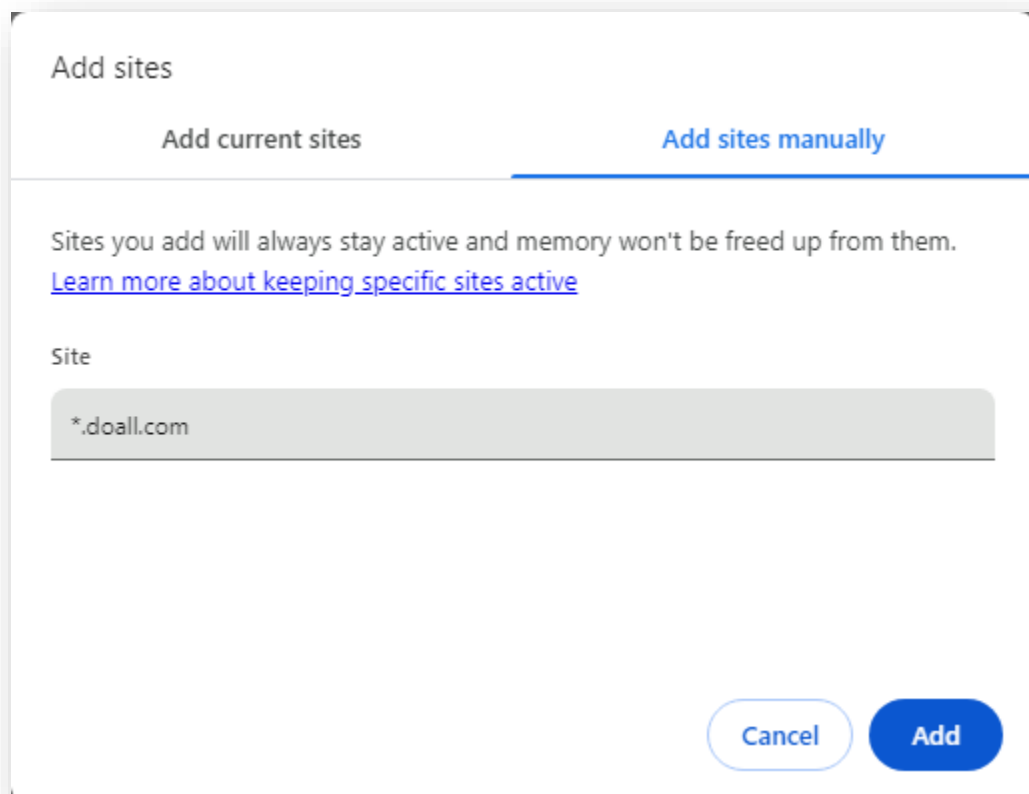

GOOGLE CHROME

Copy/Paste the following address into your address bar - **chrome://settings/performance**

A Settings/Performance page will open. In the General box, look to the bottom for the **Always keep these sites active** option with the **Add** button to the right.

Click **Add**, select **Add sites manually** at the top of the pop up and enter the following site URL - ***.doall.com**

- Note this is formatted slightly different from the site used in Edge

Click **Add**

You will now see the site listed.
